

BUREAU
VERITAS

SUPPORT TO WIND TURBINE INDUSTRIES

APQP4WIND, TRAINING, CERTIFICATION

APQP4WIND TRAINING

Bureau Veritas provides the full training program needed to implement APQP4Wind at suppliers and wind turbine manufacturers. Our training set up and trainers are approved by the APQP4Wind organization and have extensive experience and knowledge within the wind industry that will ensure participants to get the best training on the market.

APQP4Wind Specialist Training

The APQP4Wind Specialist Training will give the participants a basic understanding of the APQP4Wind process. The participants will be introduced to the framework, the requirements and the tools. In addition they will be trained in how the tools can be used and applied in practice.

TARGET GROUP

Quality management, coordinators, experts, system-people and others involved in the APQP4Wind process.

DURATION

4 days of 7 hours (excl. breaks) effective training per day. The training is organized in either 2+2 days or 4 consecutive days.

APQP4Wind Management Awareness Training

This training will give the management a basic understanding of the management's role in the APQP4Wind process, and the management will be introduced to the framework, requirements and the tools. The training will also enable the management to reflect on the resources needed in order to have a successful implementation of APQP4Wind.

TARGET GROUP

Top management, managers and quality managers working in companies that deliver to the wind industry.

DURATION

5 hours.

APQP4Wind Awareness Training for all employees

The APQP4Wind™ Awareness Training gives all employees working in the wind industry a basic understanding of the APQP4Wind™ process. The participants will be introduced to the framework, requirements and the tools with focus on the role of employees involved in processes related to APQP4Wind™.

TARGET GROUP

All employees working in the wind industry.

DURATION

1½ hour (excl. breaks). The training can be held as internal training in the company by trainers who have attended the APQP4Wind Train-the-trainer course (this will add 1½ hour duration for discussion and test).

APQP4Wind Internal Auditor Training

The APQP4Wind Internal Auditor Training will give the participants a basic understanding of the APQP4Wind processes with focus on the value and purpose of doing internal audits to support the implementation of the APQP4Wind process. In addition the participants will be introduced and trained in how to plan, do, report and evaluate an internal audit and the audit program.

TARGET GROUP

Internal auditors, quality coordinators, experts, system-people and others involved in the internal audit process. Knowledge and experience within APQP4Wind is recommended.

DURATION

2 days of 7 hours (excl. breaks) effective training per day.

APQP4Wind Train-the-trainer course

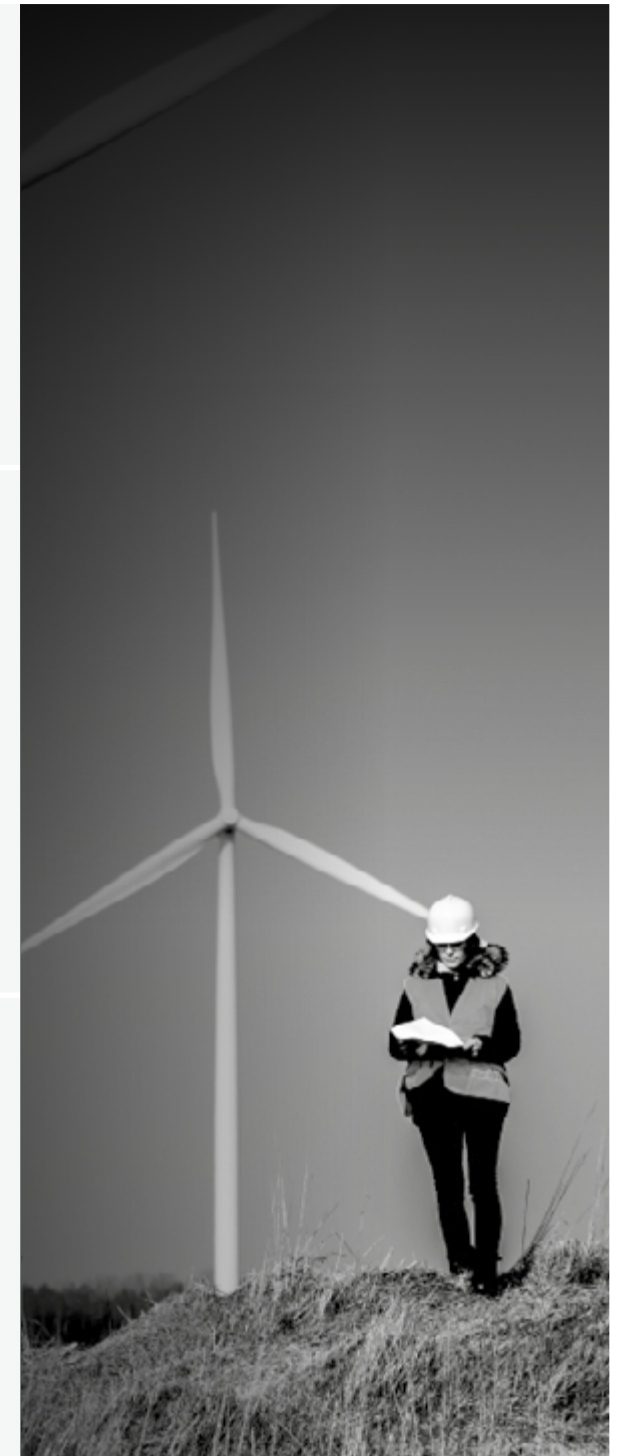

On this course selected employees will be trained in providing the APQP4Wind Awareness Training for all employees, to colleagues. The course will enable participants to reflect on their role as trainer and how to convey the training. To become an internal trainer it is necessary for the selected employees to attend the APQP4Wind Awareness Training for all employees and pass the APQP4Wind Train-the-trainer test at the end of the course.

TARGET GROUP

All employees working in the wind industry.

DURATION

2 hours (excl. breaks).

BASIC CERTIFICATION

ISO 9001

ISO 9001:2015 is an international standard of quality management, which is useful for all types of companies, industries, processes and products. ISO 9001:2015 provides a framework to deal with the changing quality requirements in balance with society, economy and the environment.

ISO 14001

With a certified ISO 14001 environment system a company can document that its processes, activities and expertise are aimed at minimizing external environment impacts. The standard requires that the company commits to continuously improve the environmental efforts, observe relevant laws and regulations in the environment field, and prevent contamination.

DS/OHSAS 18001

A certified working environment management system ensures a continuous focus on a good and safe working environment. This focus will result in reduction of accidents, sickness absence and production shutdown.

ISO 27001

ISO 27001 is an international standard specifying the requirements for Information Security Management System (ISMS), with the purpose of enabling a company to assess the risks it faces and to implement the actions that are necessary to protect confidentiality, integrity, and continued availability of information.

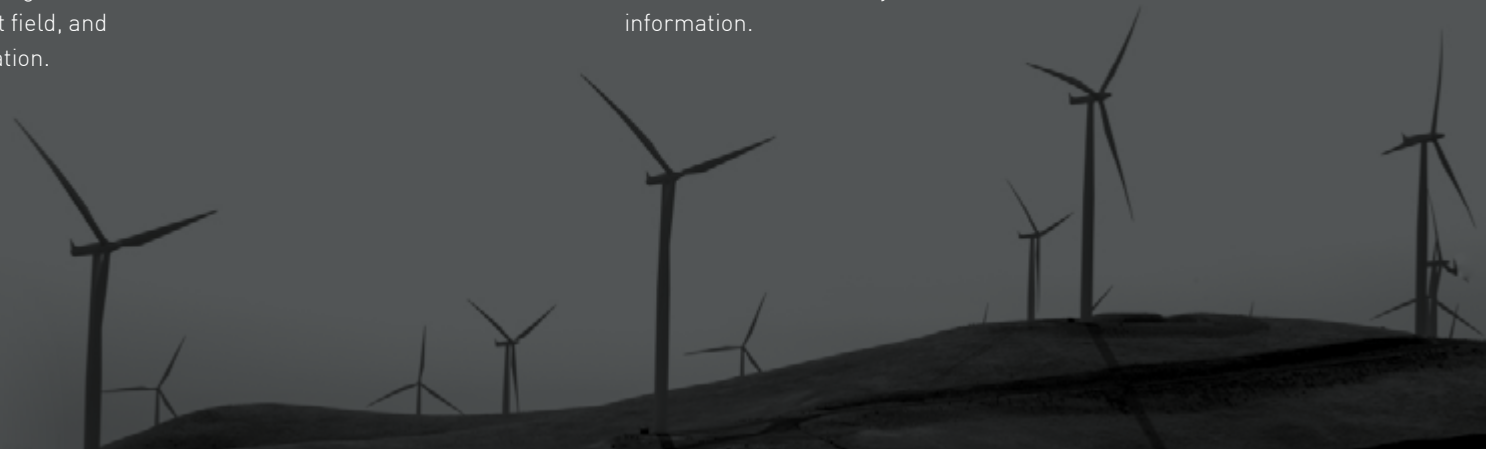

GWO (Global Wind Organizations)

Organizations that deliver training in relation to the GWO standard are subject to have a GWO approval, which can be obtained by being certified by an accredited Certification Body. Bureau Veritas has the necessary approval to make this particular certification.

For more information about our certification services please visit www.bureauveritas.dk

Bureau Veritas offers certification services within quality, environment, working environment, safety, social responsibility, and product certification. Bureau Veritas is a world leading Certification Company, and with more than 60 accreditations we can provide accredited certification locally in each country as well as verification services.

Read about the most common used certifications in the following.

THE WORLD'S LARGEST TRAINER

At Bureau Veritas Business Academy you will find a wide range of courses within quality, environment, working environment and food safety. Our goal is to ensure that you are the best in your class and always kept up to date.

Lead Auditor

On our Lead Auditor courses you will get a thorough insight into the principles of the standard and become well prepared to conduct a process audit.

Internal Auditor

With our Internal Auditor courses you will strengthen your process understanding and learn how to conduct an audit. After the course you will have obtained knowledge of audit techniques and tools.

Inspiration Seminar

On the Inspiration Seminars you will get the basic knowledge of a certain standard.

Upgrade Seminar

With an Upgrade Seminar you will get insight into the new standard and get a sense of what the latest changes will mean to you.
